

SPARSH

SPARSH MACHINE TOOLS INDIA PVT. LTD.

— Your Trusted Industrial Partner —

**JEWELLERY MACHINES, TOOLS &
CONSUMABLE PRODUCT**

2026 EDITION

COMPANY PROFILE

Hitesh Shah
(Founder & Director)

Sparsh Machine Tools (India) Pvt. Ltd. [SMTIPL], formerly known as **Sparsh Enterprise**, is based in Mumbai – the Financial Capital of India. Established in 2019, the company currently operates from **three locations** : Dahisar (Mumbai), Rajkot, and Ahmedabad.

From traditional hand tools to advanced machinery, our product range is designed to enhance **productivity, precision, and superior quality**. At SMTIPL, we provide reliable solutions that support jewellery factories at every stage – from design to final polishing. We are widely recognized for delivering **strong after-sales service** and dependable technical support within the jewellery manufacturing industry.

Director's Mission

Mr. Hitesh Shah, known for his trustworthiness and reliability, aims to be a complete problem-solver throughout the entire jewellery manufacturing process. With over **20 years of experience** in the jewellery industry, he brings deep practical knowledge and customer-focused leadership.

Director's Vision

His vision is to establish SMTIPL as a Trusted Global Partner by providing innovative, reliable, and high-quality solutions that help jewellery manufacturers grow with confidence.

FEATURES

- Ceramic-reinforced composite material
- Biocompatible and patented
- Fast and easy to process, grind, and polish
- Highly resistant to adhesion, scratching, impact, and wear
- Sterilisable and compliant with medical-technical requirements
- Color Fast and UV stable
- Finished workpieces can be galvanised

ALLOY

Our alloys are precisely formulated to deliver stable hardness, controlled melting points, and reliable results in industrial applications.

Master Alloys for Colored Gold (By Chocksi Heraeus)

Alloy No.	Color	Karat	Application	Hardness HV	Casting Temperature °C			
					10k	14k	18k	22k
H-111	Deep Yellow	8-14k	C,C/S	124 (14K)	980	965		
H-160IA	Deep Yellow	8-14k	C,C/S	145 (14K)	960	950		
H-160I	Deep Yellow	10-14k	C,C/S	145 (14K)	960	950		
H-177B	Yellow	18k	C,C/S	132 (18K)			975	

Silver Alloys

Alloy No.	Color	Karat	Application	Melting Temperature °C
SMT-925	Yellow	---	---	1000 – 1010

APPLICATION AREAS

Our master alloys are widely used in:

- Gold jewellery casting (10K, 14K, 18K)
- Fine detailing and micro-setting designs
- Colored gold manufacturing
- Professional workshop and mass production casting
